

A Global Hydrogen Future Workshop Survey Results

Survey Questions:

1. What is your overall rating of the workshop and any comments? (Scale 1-10, 10 being the best)
2. Any comments on the overall organization of the workshop? Any hotel or other logistical issues?
3. Views on the Morning plenary
4. Views on your Afternoon Breakout Session

1/3 of workshop attendees responded to survey request

Overall Rating: 9.18/10

- General comments on the workshop were overwhelmingly positive.
- Attendee Thoughts:
 - “The workshop lacked [industrial] diversity and wished there was greater representation from companies producing H₂.”
 - “I would like to thank the EFI team for this excellent organization of the workshop. It was a great opportunity to learn about the project and to network with the attendees during all the sessions.”

LESSONS LEARNED: Additional interaction with keynote speakers, right-sized breakout sessions, and better alignment of expectations of attendees versus sponsors (conference/workshop) are critical success factors for future workshops.

Breakout Sessions:

- The afternoon breakout sessions received mixed reviews, but overall was met with a positive response.
- Participants wanted:
 - a) “to be consulted on which breakout session they wished to attend”
 - b) “to go to more than one breakout session”
 - c) “the moderator to play a larger role in guiding discussion, enforce speaking time limits for participants, and ensure everyone had an opportunity to contribute.”
